

Tobacco Registration and Listing Module (TRLM)

The agency recognizes that Tobacco Manufacturers in areas affected by natural disasters are dealing with extraordinary circumstances, and as a result may need additional time to submit their registration and listing information to the Agency.

Under Section 905 of the FD&C Act, owners and operators of domestic establishments engaged in the manufacture, preparation, compounding, or processing of tobacco products are required to register their establishments and provide a listing of their products with the FDA. The compliance date for the registration and listing requirement for domestic manufacturers of newly deemed products on the market as of August 8, 2016, and continuing operations after August 8, 2016, was extended to October 12, 2017.

For entities who need additional time to comply with the October 12, 2017 deadline because they were directly impacted by recent natural disasters, please send an email to FDA at CTPRegistrationandListing@fda.hhs.gov. We request you include "Natural Disaster" in the subject line and provide the following information in the body of the email:

- Name of the Owner or Operator of the establishment
- Name and Address of the establishment
- Phone number - so that FDA can follow-up with you
- Best time to call and speak to the Owner or Operator of the establishment

The Agency will assess each situation on a case-by-case basis.
